

# QARGO

# A New **Kind** of TMS

## INTEGRATION

**Qargo TMS + = EXACT**  
Online

### **Smarter Accounting for Transport & Logistics Businesses**

The integration between Qargo's transport management system and Exact Online's accounting software gives transport companies a smarter, faster way to manage operations and finances.

By connecting your TMS and accounting platforms, you eliminate manual admin, sync critical data in real time, and gain end-to-end visibility—saving time, reducing errors, and accelerating cash flow.

## CUSTOMER BENEFITS

### **Automate Financial Processes**

Automatic synchronisation of purchase invoices, sales invoices, credit notes, and PDF financial documents between Qargo and Exact Online removes the need for manual data entry—saving hours of admin every week.

### **Improve Cash Flow Visibility**

Payment statuses are instantly reflected in Qargo when invoices are marked as paid in Exact Online, giving your operations and finance teams a real-time view of what's outstanding and what's been settled.

### **Streamline Customer Data**

Customer records can be synced from Qargo to Exact Online, ensuring consistency across systems and reducing duplication.

### **Reduce Errors and Rework**

With fewer manual processes and consistent data across platforms, the risk of errors drops significantly—supporting better decision-making and smoother audits.

### WHY IT MATTERS FOR

**= Exact Online CUSTOMERS**

Transport and logistics companies face unique accounting challenges-from high invoice volumes and fluctuating costs to complex subcontractor and credit arrangements.

The Qargo + Exact Online integration is designed specifically to meet these needs, helping mutual customers:

- Eliminate hours of manual data entry.
- Improve accuracy and reduce financial admin headaches.
- Speed up invoicing and payment reconciliation.
- Connect finance and operations for better team collaboration.

### WHY QARGO

- Cloud-based SaaS model keeps pricing low and innovation high.
- Included in your Qargo TMS plan-no extra cost.
- Dedicated customer onboarding and support team.
- Flexible and customisable to meet specific business needs.
- API integrations with key systems to streamline operational workflows.
