

# QARGO

# A New **Kind** of TMS

## INTEGRATION PARTNERSHIP

## Qargo TMS and Exact **Revolutionising** Transport Management

The integration equips transportation companies with a powerful system for fleet optimization, time and cost savings, and compliance. Verizon Connects telematics, GPS tracking, real-time location data, and electronic logging devices, combined with Qargo's advanced TMS features, drives impactful result for mutual customers.

## CUSTOMER BENEFITS

### Optimize Routes

Real-time GPS data feeds directly into Qargo TMS, allowing dispatchers to make fast, data-driven adjustments that reduce idle time and fuel costs, enhancing operational efficiency.

### Improve Fleet Management

Monitoring fuel consumption, maintenance needs, and driver behaviour from vehicle performance data in Qargo TMS reduces costs and enhances safety.

### Automate Data Entry

AI-powered data input and automatic invoice reconciliation saves 100+ hours a month of manual work, and reduces errors.

### Enhance Customer Experience

Real-time tracking, combined with the functionality of Qargo's Customer Portal, enables businesses to improve the customer experience by centralising communications and providing accurate updates.

### Ensure Compliance & Safety

Qargo's compliance tracking, combined with Verizon Connects tachograph data, ensures adherence to driving time regulations while providing real-time feedback on driving behaviour to support safer, compliant operations.
